Guys, this is just nutz, someone do something

Silent Kane --{}----{}-- says:
Back
Dante says:
mmhmm
Dante says:
http://www.renegadeforums.com/viewtopic.php?p=106715#106715
Silent Kane --{}----{}-- says:
lol
Silent Kane --{}----{}-- says:
I don't think stuff like that is good on a public forum that is visited by kids
Dante says:
i imagine it will get deleted, but oh well
Dante says:
neither is 90% of the content, but eh, what can you do?
Silent Kane --{}----{}-- says:
The girls are ugly anyhow, lol
Dante says:
its just a pissing contest between you and jonwil, and its quite annoying
Silent Kane --{}----{}-- says:
His stealing is annoying.
Dante says:
the lack of sharing public knowledge to claim something as "yours" is annoying, quite honestly
Silent Kane --{}----{}-- says:
Most of the stuff is quite dangerous and most of them wouldn't understand how it works.
Dante says:
yes, most
Dante says:
but still, its annoying to see "its for our mod, look how pretty it is"
Dante says:
and dangerous = crashing peoples computers, not cheating in a game where an anti-cheat app is
supposed to be maintained
Silent Kane --{}----{}-- says:
I can easyly crash the game of other players
Dante says:
so can i
Dante says:
without your code
Silent Kane --{}----{}-- says:
The code makes it easyier
Dante says:

not much
Silent Kane --{}----{}-- says:
The code snipped that can crash the stuff is used almost everywhere
Dante says:
just saying i see no point in "hiding and cowering" information from other people when plenty of people can put good use to it
Dante says:
main reason i left the game, no one like sharing, its like you all missed kidnergarten
Dante says:
not helpful, not informative, only blaming, flaming, and shitting on other people
Silent Kane --{}----{}-- says:
That's another problem. Lets take the dialog stuff as example (4000 lines of code). I can see n00bs do stupid shit with it
Dante says:
don't use that word around me, i have more then a 4th grade education, and you can use the word idiot around me
Dante says:
yeah, they will do stupid shit with it, crash there computers, piss and moan about it, blah blah, but in the end, someone might do some good with it, and expand on it more then it already is
Silent Kane --{}----{}-- says:
I don't know anyone besides me that can understand how it works/how to use it. It's quite hard
Dante says:
and im pretty sure you aren't the smartest man in the world
Silent Kane --{}----{}-- says:
I'm not. But most people in the renegade community probably don't even know what a virtual function table is
Dante says:
and im sure that there is a shit load of stuff that you don't know about, you can't "not help" by assuming everyone is an idiot, and you are smarter then them
Dante says:
i remember when you couldn't code yourself out of a paper box
Dante says:
and that was... less then a year ago
Dante says:
so it can't be that hard, if you learned it since then
Silent Kane --{}----{}-- says:
I can learn fast. I was able to learn everything required for the dialog stuff in a half year (that includes assembly and C++ knowledge)
Dante says:
ok, so you are the smartest person in Renegade?
Silent Kane --{}----{}-- says:
Most likely. And I will think so until someone does better stuff than I do.
Dante says:
thats sad
Silent Kane --{}----{}-- says:
Nobody can prove otherwise
Dante says:
lol, you go on with your bad self mr. genious, let me know how that works out for ya, k?

Silent Kane --{}----{}-- says:
It goes fine so far.

love it or leave it, this is what is "driving" your modding outcome.
