Subject: Question about renchat2

I know this is an old post that I brought back but I have found what I was looking for. Now I'm using ASP and I have figured out what I need.

But now what I want to know is I can access the top 10 players (I know how to access the top 25 but I wont post that here) but how do you access the rest?

http://renchat2.westwood.com/renegade_embedded/individual/ranking.html

This is the link. What if I wanted to find other rankings?
Like 11-20 Or Maybe search by name
i.e. wnxtilly

I think Snipesimo might be able to help me

Thanks

Tilly
