I contributed...

Hey, add a jokes section... (for text jokes and QA jokes, etc.), have a text box to put a sample of the joke (if it's a long joke), or the joke (if it's a one liner or something), and have a text area to put the entire joke. If text was put in the "entire joke" text area than the sample appears as a link on the main jokes page, when the user clicks the link a window opens with the entire joke in it.
