IceSword7So you guys are so anti-piracy howcome you arent the nazi's that are passing around the petition to get kazaa banned from the internet.

Easy, I do it too. I'm just making the point that it's illegal no matter how you look at it. I speed, I drink, I download music (90% is on a disc i have, but some songs aren't), I pirate software. Well, mostly just the outrageously costing software. It's still piracy either way.
