You can prove a point in a non-childish fashoin jball.

Piracy isn't better than rape or murder. It's equal to both crimes, for the exception that your not f\*cking someone and your not killing them. downloading is also known as "pirating music/games" is stealing from the music artist/group. So in the end your both losing in a sense. The band/artisit is losing money, and you just got tracked by the police, so is it really worth the effort? I wouldn't think so.
