zunnieYep, this also happening to all the FanMaps servers recently.

Some n00b is probably responsible for it. This guy joined the server a few times as well and there is no doubt in my mind he or she has something to do with the recent crashing of the FDS's.

H4ckBot\*\* Screenshot

They used to run fine for a long time. Now they seem to crash at least 2 or 3 times a day. They just quit to desktop and dont restart at all or they do restart and get "Failed to create channel" for over a freaking hour.

Its very annoying.

I hate n00bs.

theplaguethats funny because the same thing happend to some of the other servers i was playing as well... i get kicked, and then do a server refresh and the server shut down... and then when i refresh in like 1 min, the servers back... lolx

I dont see whats funny about that really. We spend alot of money on these servers to provide people a (hopefully) nice place to play at, and some scriptkiddies and n00bs think its funny to crash their servers. Its just 1337-gay.
