Well guys and girls, seem like there is a lot of this going on, and yes its driving us all crazy. I just hope its not just one guy doing this, because if it is we should all just give him a blanket party and beat the hell out of him ..lol .just a shame we probly will never know who is doing it that is if its not west wood just trying to get rid of Renegade. we all know they hate to suport it since the game is fairly old and maybe they are just trying to make room for new games
