We rent a few boxes at Server Matrix also.

They been crashing like every day, all day and usually like every 15-45mins of playing.

I dont think its gotto do anything with Servermatrix, not entirely sure though. I can remember saying "My home fds didnt crash yet" today. And guess what lol: Now my home FDS 14 Player aow server is also crashing all the out of the blue.

The servers listed on USA crash most so my guess is that someone on WOL irc has some bots going on or whatever and is exploiting a bug we dont know of yet.

No idea. Its just very gay. :/
