SuperFlyingEngiGamespy = sucks.

Here's why.

A) It loads tons of spyware crap on to your computer. If you have Gamespy installed on your computer, you might as well light the hard drive on fire. Unless, of course, you download a spyware removal program.

B) It takes twice as long as WOL to load and/or do anything.

C) Gamespy = sucks.

I havent encountered any gamespy "Spyware" with any spy removal programs ive used. . .

The extras 15 seconds to load, boo hoo cry about it

GSA>WOL because of the name length also, no 9 cahracter limit no caps or character restrictions

GSA>WOL again because frankly I believe that Gamespy cares more about Renegade then EA ever will.
