Tell me... when did i say my pc is the best? My pc actually is half decent, if you want to know, and i have 1gb of ram, 2.26ghz processor, ATI X800 XT Pro, 2 80gb hard drives thats enough space. There arnt many computers with that kinda specs.

kaboomer23mine around 61 to 80 at most "D

well would you look at that? i dont think the fps mentioned on the movie is the only one is it? Read all the replys before you say something. Getting 120 FPS at 1024x786 is pretty good if you can run games like Doom 3, HL2, but games like ren... waht is so hard with that? Its not hard at all, and I never said having 120 FPS at that resolution is low did I?
