See Ack, that is just my point. You think our work sucks. Different people have Different skills. I dont tell the people that come to my about things, there work sucks. I tell them ways I know to help them imporve. I try to help instead of just saying, "it sucks". I understand you think our work sucks, you have stated so many times it yeild no more of an effect. I used to pick out things in RenAlert to counter you on, then I realized how immature it all was.
