---

I can throw myself in aswell.

I Know Enough about modding Renegades Asses't's aswell as a good set of knowledge in Gmax/3D Studios Max. Im willing to help others , which can be easily proven by my posts here or at <http://www.modding.renstation.net> , <http://www.n00bstories.com> or the Reborn ([www.cncreborn.de](http://www.cncreborn.de)) and Renalert ([www.renalert.com](http://www.renalert.com)) Mod forums. I dont think I ever get too involved into the flame wars. I also do not have a biased opinion on any modifications for this community.

Think of the Dough Boy.

What I really want to see is someone who is willing to help others trying to learn to mod and is there to answer there questions when they are asked.
