CrimsonScrumfyAnd no, we don't run renguard because we want to play with cheaters...We don't run it because we feel that manual moderation can do the trick (and keep full servers). Personally, I'd rather not get into that again, though.

But... you DO run RenGuard...

No we don't. We just use the protocol to check who is and who isn't. Even that is unnecessary in my opinion.
