---

I want to play the Multiplayer practice map on LAN with my friends, mainly because it has AI and I only have 3 friends to play with, so it would have more action. I dont mind the lag because we all have fast internet connection. If i have to download renegade public tools i will just please give me instructions because i dont really know how to do much of the mapping stuff :rolleyes: . I have looked online for other AI maps but I havent found a good one so far... and I think I would like the MP practice best.
