---

Hi, XilLone here, my clan co leader just installed renguard, everything went smooth, but when he join a game on renegade , it works good for about 10 sec than he disconnects from the server. this only started 5 min after he installed renguard. He owns his own 60 player server and hes now using the renguard server side client for about 36 hours now. Because we have had somemany cheats in the last 48 hours (Before we started running renguard on the server) that we just got tired of it. Hope you can help us.

Also all his renegade and renguard stuff is fully updated and such..
