Wow very nice work. Like I always say, it SHOULD look plastic. lol It's the future! All our guns and tanks will be made of plastic sooner or later and I think this is a very realistic prediction. As I've used in my examples, what happens when Kia, Hyundai, and the like switch over to wartime production? Plastic Tanks with Huge Mufflers, Spinner Treads, Colored-LEDs, Vinyl Graphics, and a Cold-Air Intake. lol

OMG L13k D@T TANX IZ DUB CITYZZ!!!!1111

Anyhow, I don't think its a bad thing if their textures look a little plasticity.

And whoever made this gun model and the texture, much kudos to you.
