OK i got my always.dat all set and it was running great and everything was fine.

I added bots and they run around and shoot for hours with no problems. But if i get involved and my health gets to around 40-70 the game crashes to windows. I can Die, and i usually do, but every once and awhile it does crash.

This only happends when it get to one of those numbers. I should have all character animations, all of the S_A, S_B and S_C And the bots kill each other for hours and it doesnt crash so i think i have all of the files.

Anyone?

edit: Oh and i have the Gesture files as well.
