I know this topic is meaningless to Renegade, but I would like to know if there is a good multi-messaging platform out there. One that will let me connect to MSN, YIM, ICQ, IRC, and AIM all at once. Please post the website for it. Also, there are a couple things I would like for it. It must have the Display Picture For MSN and Voice Chat For Yahoo! Messenger. Please, someone, anyone, find this perfect messenger for me!
