Speeded Westwood Maps

Quote:

These files were edited by Blazer and provided for your use by <http://www.n00bstories.com>. In these files, he simply opened the .mix files and removed some un-needed file references. This produces a DRASTIC improvement on load times, even on fast systems.

Also, big thanks go to Dante for discovering this. He deserves most of the credit.

Im wondering btw just WHAT exactly did you change in the maps then that make it load so much faster?
