Yeah it is a bit of a pain that they used the same string for all three of the units and not cloned them for each one. As ACK said it will change all three units. I'm not sure if Blaze Regulator can help here. I haven't used or know much about the program but I think it is able to track purchases of players and log them. I may be wrong and it might just be vehicle tracking, i'm not sure. Maybe look into it.
