Renardin6The Mobile stealth Generator. (model : permagrín , texture : me)

How will it work ? Simple. All vehicles and infantry coming around it on a certain range will be stealthed. I must wait in game tests for more details.

Oh no! Here comes the Bat Mobile!

Seriously though, I think you could at least stand to make the tires look a little rounder....err, wait, the one in your reference didn't have tires. They look more like metal roller type things..
