NateSir PhoenixxNateNo, he is not a dumbass... there is an aimbot in one of the links. And there is a program and it works. Why? Why? Why?!!! Release an aimbot... sniff sniff... now the whole game will be flooded with noobs.

OMG, where do these retards come from... :rolleyes:

There is no aimbot in any link on this page.

Some people are really dumb. Can't you act like in the movies? Idiot, seems like someone wants to be a little smart here... pathetic. What the hell are you trying to prove? Show the whole forum that your smart to notice that "no link". Shit...

I already know that click bot crap... aimbot doesn't exist because no one even bothered to make a better one than click bot. I rest my case... why am I even explaining to you? who are you to me?

Can you see my signature? Does that look like someone who doesn't understand or even know Renegade?

Lol... OMG, you still don't get it that there is no cheats what so ever in this thread, or in the links posted in this thread? Dumbass, this was an April fools joke, you're not even intelligent enough to figure that out. What am I trying to prove? Nothing except for how stupid you are. Looks like I succeeded.

You have really done a good job of showing your ignorance and stupidity, I applaud you.  
:rolleyes:
