Renardin6...do you really think mobile stealth generator is real ? ...

The fact that the vehicle is a creation of science-fiction is no excuse for your pitted attempts at texturing the model.

Oh, and by the way: the images were my final attempt at the 'constructive criticism' that you whine about ceaselessly. I don't think I will continue to attempt to assist your plight to create a mod [with my suggestions], since you are obviously insensitive to any kind of critiquing of your work, constructive or otherwise.
