icedog90j_ball, one more post and you've got 1337 posts.
I know, I was waiting for a good topic to post on, but now I can't access my fucking account thanks to EAX. I am going to figure out where they live and kick their asses. Seriously, if I find out where they live in America, I'll fly/drive to where they live and beat the living shit out of them. They've taken the easy way out by using their stupid programs to hack me, now it's time for me to fuck them up bad.
