I found an easy way to past renguard with to pc's. first you start up ren with renguard and ren on the pc that you are not going to use to acctually play in. then you logon to ww with the name that you are going to play on. then you exit Ren and rg. then you start up ren and rg again but u dont do any thing. next you go on ren on the other pc, but dont use rg. then logon to ww with the name that you used on the other pc.
