AircraftkillerNo.

So... You actually want to stir up problems here?

AircraftkillerThat wasn't really constructive by the standards of our friendly whining children here. It was simply an observation.

If you have specific problems you can obviously circle them on the image and post the image.

ACKToo much artistic "liberty", not enough Tiberian Sun. Like always with Reborn.

Let me count the artistic liberty in RenAlert...

1. There is an actual model of the light tank in the 2nd or 3rd Allied briefing movie (top right corner). This model does not look like the model in game.
2. Snipers were originally not in the game, however they are on both sides in Renegade Alert. (Yes, I do know that there is a sniper weapon in the rules.ini)
3. Volkov has an anti-tank gun.

The point is, you're allowed to make the mod how you want it. Reborn has the right to make it how they want to make it. That is their decision. You might disagree with it, but that doesn't make it wrong.
