Okay, sometimes you need to go and look around. If you killed a guy in a red suit that was the captin. Now, go and look for the place the captain use to be in. This always happened to me, as what they do is get you to just go to the location and kill every thing. But since you didn't do it in order the AI is messed up, so go back to the bridge and look for where the now dead captain used to be. Or press E by the sub.
