You may have confused the game by doing something that it didn't expect and you will have to replay that level. First try to go where the capton was and see if the game coninues.

I've hade something like that happend 3 times to me. One of them was, I sabotaged the torpedos b4 i was told to and then later later on it told me to do it but i couldn't, because i already did it, but the game wouldn't end until till i did it. So i had to replay the level.
