I believe marijuana isn't that bad at all, as long as it's in moderation. You don't got and smoke four blunts a day. But once every couple of weeks, or even every couple of months, isn't so bad. Sure, it has negative side effects, but it also has positive ones. Not everyone gets the "adurrr I'm a moron wheeeee" type of high. A lot of people use it to let ideas flow easier (artist for example). I enjoy it because I can see things in other peoples perspectives, and I don't get mad when someone is ignorant, I just smile, and we keep discussing. And as of yet, I have not experienced ANY negative side effects. Alchol however, gives you hangovers, makes you through up, and you smell and act like a complete ass. Atleast you know what your doing when your high.
