hello.

I'm new to renguard. I've never played renegade online really. but, Now you need renguard to play renegade online. so, I've installed it and it worked. but, when I'm offline, I can't play renegade. for some reason. When my pc has no acces to internet, renguard crashes. well, I get a white screen and nothing happens. so I'm not able to play renegade. Is there a way to solve this problem? So I can play renegade when I'm offline? because I'm not able to be online as much as I want.

Thanks for any help.
