---

I feel like complaining.

I just got my lowers on today, and they decided to give me a bite plate to keep me from sawing off my lowers with my upper teeth. Unfortunately, they didn't tell me I wouldn't be able to chew. Not because it's painful, but because the bite plate stops my molars about a quarter of an inch before they can touch. I can't eat anything solid unless i take 10 minutes to smash it against the bite plate with my tounge.

Sorry, but I'm pissed

Oh yeah, if anyone hits me in the mouth, they die. This hurts like fuck.
