BlazerUltron10Hmmm, I wasn't laggy but Crimmy wasn't on when I was I think.

Apart from the occasional FPS stutter (I think this is server related because it doesn't often happen) it's a terrific game.

Well worth the payment if many people buy the game because battles will be amazing.

It just didn't seem much different than playing Tribes/Tribes2. The only benefit is that it's a persistent world. What's wrong with Tribes?
