How to reinstall CP1

Open your registry editor (Start --> Run. Type "regedit")*, go to
HKEY_LOCAL_MACHINE\SOFTWARE\RenGuard
and set PatchVersion to 0

Re-Start RenGuard then - it will re-run the CP installation and re-download the current (maybe changed) patch file. We are adding fixes and more debug info all the time.

* if you're unsure of what you're doing, you might want to ask for more help on these forums.
