Yup, looks great.

And those are spare road-wheels, Usually you don't see many tanks fitted with spare ones of those since they are a bitch to change. usually you just see spare strips of tread which are also a bitch to change, but either way.

Those are spare road wheels, for when you have a nasty encounter with a commie heavy tank or one of your own mines! Spare wheels! Good for me! good for you! ...Not so good for the enemy.
