---

I am doing all I can to resolve the 2 "major" issues with Core Patch 1, namely the problem with always.dbs/languages and the problem where people cant download anything.

The rest of Blackhand Studios is helping too where possible.

We are doing the best we can to get these issues (and any other issues that may arrise) fixed. (it doesnt help with no-one on the team is able to reproduce the issues in question)

Just remember folks, this is a Beta Test so bugs arent entierly unexpected.

The purpose of the Beta is to find the bugs and fix them before we go live for a final release.

Also remember that the members of Blackhand Studios have lives too and that we cant spend 24/7 working on Renegade.

And remember that unlike a big games company, we only have access to a very limited amount of test setups to investigate problems on.
