flyingfox

the justification of the ramjet is that it costs a thousand apiece. when someone pays a thousand credits for one, they're allowed to have the advantages of a raveshaw and sniper combined, with improvements in ammo count, accuracy and ease of kill.

If you put it that way, then it should cost over 1500 credits. A raveshaw already costs 1000, plus the sniper which costs 500, then all the other bonus' you mentioned.

Downsizing the clip size seems like a better solution to me
