I don't know whether this has been talked about yet or not. But, I think that RG should either have set usernames or be able to check all usernames currently available on the computer. Or something like that lol. More or less because, it logs you in as the last name you used, and in servers that dun RG if you have a different username, it says you aren't running RG when you really are. So if there is anyway to fix this that would be great! Thanks.
