I have a chatroom on my site that was JACKED! It's on gamesurge, does anyone know another good place? Please, if you say n00bstories, tell me how to register with them.

I know my website related topics are old.

You want to know the STORY? okay... sure:

I was making my clan site (the small, junky one) and my friend goes on and says: "hey, you can register this for a Authserv"
I said: "later on"
Then he goes and does it anyways, making me subject to his KICKS for no reason, and now I can't even kick him. Worse yer, he tells me to go ONTO IT AND THEN KICKS ME!

I don't wanna seem like a uncle fucker, so can someone tell me where to put this so he can't bother me?

Thanks... lol...

Oh, and if there is a way to go and host this off of my computer along with my website, tell me!
