Silent KaneLaeubiSilent KaneThere are 2, maybe 3 people who are able to create that kind of cheats.
So making it check the dlls would be pointless. And if they decide to check that, I will just use a simple way to get around it.
People who cheat are often not the same which create cheats. :rolleyes:The people who are able to create them wouldn't give anything out that can be used for cheats.
Unless their name started with a T and ended with a Y.   :rolleyes:
