That's crappy Scythar, you're running FarCry in the menu, not in-game. Nice try.

Renegade crashes in windowed mode if you press print screen. If you hold Alt and press print screen then it will not crash but only copy it to the clipboard. Use Fraps to take pictures.

I set Renegade to my desktop resolution so that when I play in windowed mode, not only am I going above 100 fps, but it also looks just like regular mode since it covers the whole screen.
