---

Majiin Vegetait was either the beta or the first version release after the beta that had CPU spikes.. would drop my FPs ingame to 10 then back up.. that was annoying.. doesnt happen in the current versions tho

so the fps lag was true

Yes, but we're talking about this version of RenGuard. It's kind of like how a lot of people don't play RenAlert because they didn't like the first beta, and they assume the current version is still shit.
