Hi

Yesterday I foolishly downloaded game.zip to run Renegade with no disk. Consequently Renegade no longer ran. So i deleted Renegade and Renguard from my system and re-installed the game. Now I can not play multiplayer games over the internet with GSA or through the games main menu. Renguard will not work due to a bad always.dbs and Westwood are no longer allowing on line playing sign up on their website. Hopefully I am overlooking a simple thing and someone can help me.

I have reinstalled the game several times now and always the same problem.

Please can anyone help me as I really want to play and I do not know enough about software to fix this.

Niceseven
