Actually don't really know if this is the right forum, but it is something about RenGuard.

I want a script that when a person joins it will say: [RGlocate] Player <nick> is connected to RG and idle (or is not found on RG network)

I know this can be achieved by editing the renguard.mrc from snipesimo.

But thats where the point comes i have no id how to edit the script in that way it will do what i want (mentioned above). So can someone edit it for me? lol, Any help?

/AngeR

If this is the wrong forum then move it to the right one :rolleyes:
