Sir PhoenixI read through it just before I posted that reply, and the last picture (actually, EVERY picture) of the Hover MLRS in there showed the exact same problems and issues in the uvw mapping, modeling, and texture, the only thing changed is Madtone's addition of some different coloring.

Can you read ? :rolleyes:

DethHav0cHow would you know, you haven't seen the updated version yet, because its still being worked on.

...no comments duuuuuuh...
