Well, basically on the Un-patched version of Renegade (Out of box) v1.002 I have noticed that EA, throughout time removed some items which could not be no longer found on 1.037

Such as the Multiplayer Skin Selection Screen:
OPTIONS > MULTIPLAY > SKIN SELECTION

Also in 1.002 I noticed some f8 command which are not in 1.037

There maybe more, this might only just be it they removed, but it would be good to see these added back to renegade in CP1
