If you don't like hearing a particular sound you have to find what it's called and extract from always.dat and put it in the data folder and then edit the sound and replace it with silence.

If you want to go back to the original c4 sounds just extract the
c4_remote_secondary_08a.wav (timed c4 + beeping)
c4_timed_ambient_11.wav (remote c4)
from always.dat and put in your data folder

I use my version of beeping C4, 1 short beep 10 seconds after you set it, 2 short beeps on 20 sec, 3 short beeps 25 sec, 1 long on 28.
