
Subject: Things I did not like about Core Patch

I quite like the new C4 sounds, they stop my n00bish self from standing too close to one I've placed near a beacon and blowing myself up

What I don't like are some of the new EVA sounds, like the "Danger - Radiation Detected" one. Hearing it over can get annoying (though I've only noticed it on Mesa I think)

Also the beacon countdown, the "minimum safe distance" bit drags on.

At the end 2 minutes of the match you always get morons beacons spamming, and all you can hear is basically noise.

The rest of the patch is pretty good, but I have to ask, will they be adding sounds when the player gets hurt? like in 1 player lan, he goes "urrgh" when shot.

That'd be a good addon
