Subject: SERIOUS zero-bug problem, please help...
Posted by laeubi on Sat, 05 Apr 2003 18:15:03 GMT

As far as I know there is a very simple solution (it works everytime for me):

* If you wanna play a Mod, restart Rengade and join the Mod directly
* After that restart Renegade again, and jon only normal mode games

If you play a .mix and the a .pkg the zero bug aperas other way round too if you play a pkg and after that a mix it also aperas.

Try it out, and post if that helps you too.
