i download BRENBot-135 for win32 i got my irc not set up and fds working.  
but for some reason none of the commands wokr on irc or in gmae except  
!Gl .

I hade 4 player play yester day and msg dosnet work.

also brenbot dosent pick pu any of the players  
some times tit dosent reconise peopol on irc with +V OR =OP

it like it not conneted to the game.

and some time can any help me or i do i need to give more info.
