Creed3020Majiin Vegeta:rolleyes:

omg the reborn sucks in CS source.. like wow

find something else to do

I agree with him, you guys spend more time making fun of the other mods then working on your own.

I don't spend four hours a day insulting Reborn. It takes me a few seconds each time.

I spend four hours a day working on RA. I doubt any Rebarn team members do that judging by the shit poor quality and quantity of their work.

Out of curiosity though, are you that ignorant about game design that you think someone can make a game level in the time it takes me to type out "Reborn sucks?"
